Task documentation

Data science Task

First:Importing dataset

1-I used pandas library to import csv file

Second:Data preparation

2-checking duplicated values using duplicate() method in pandas

3-dropping Duplicate values using drop duplicate()

4-checking Null values using is Null(),and filling null values with (0)

5-dropping unnecessary columns like (trans fat),saturated fats(),dietary fibre

Data Visualisations: Using plots

- Which drink has the highest calories from the dataset using pie plot
from the visualization we found out that white Mocha chocolate drink has the highest calories with 8.44% percentage .

- Highest Sugar Drink :i used pie plot to visualize it and was mocha chocolate with 7.4%
